- Ease of use
- Locate places easily.
- Get Directions to reach from one place to another.
- All Types of Map Supported
- User Can Change Distance

REVIEWS

Pros of the App

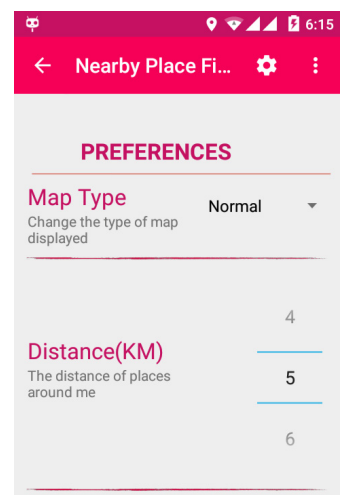

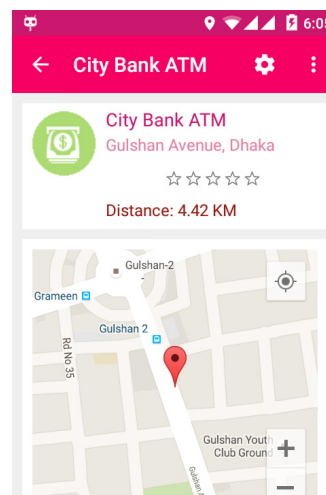

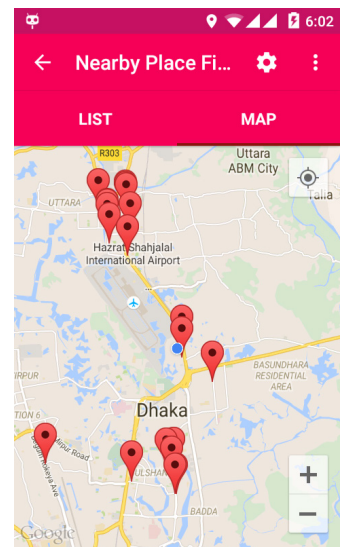

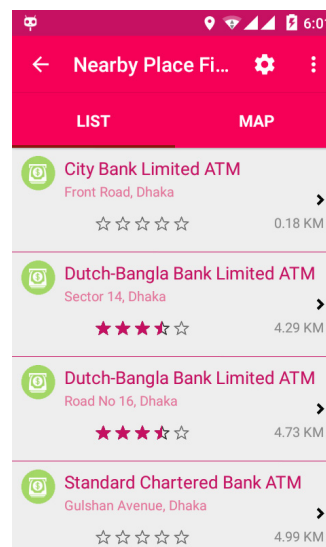

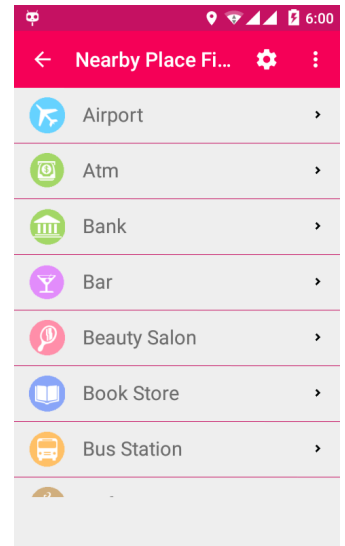

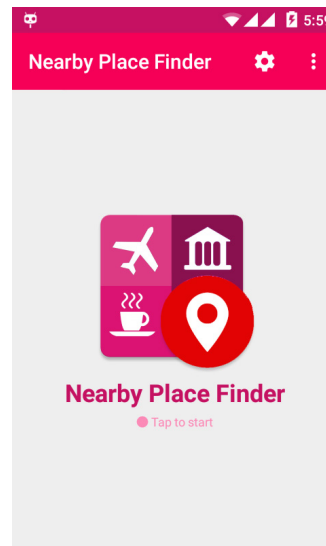

– Easy to navigate around the app, Nearby Place Finder will itself locate your position by using GPS and on the basis of that, it will find your Places of Interests.

– The app provides 50+ more categories for you to search. Each search result gives you a rating of 5 stars for every location you search for your place of interest.

– You can filter the map type by displaying as a normal view or satellite view, Also changing the distance of places of interest around the user.

– The user interface is minimal and straight to the point. The material design is guided by the Google Style Guide. It's easy to navigate and has a good comprehension userflow. The layout and colour palette is consistent using the same header for every page.

– The app uses a list view displaying all the searched results and a map view pin pointing all the same data searched from the list view.

Cons of the App

– Reviewer: "it says to wait, tracking my location.. but it keeps tracking forever". The app isn't compatible with most mobile devices.

– Colour palette is too playful.
